JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 347 Nos. 1 and 2 2 APRIL 1993

CONTENTS

Theoretical study of parallel dual-cylinder microelectrodes with a small imposed constant potential difference in static electrolyte solutions containing a reversible redox couple
W. Peng, P. Li and X. Zhou (Wuhan, People's Republic of China) 1

An efficient numerical method of solving integral equations for cyclic voltammetry
L.K. Bieniasz (Aarhus, Denmark) 15

A mathematical model for current oscillations at the active–passive transition in metal electrodissolution
M.T.M. Koper and J.H. Sluyters (Utrecht, Netherlands) 31

General theory of steady-state voltammetry
J.C. Myland and K.B. Oldham (Peterborough, Canada) 49

The influence of the single-crystal orientation on the electrocatalytic hydrogenation of benzene and the H–D exchange
U. Schmiemann and H. Baltruschat (Witten, Germany) 93

Acoustic emission from a palladium electrode during hydrogen charging and its release in a LiOH electrolyte
K. Azumi, S. Ishiguro, T. Mizuno and M. Seo (Sapporo, Japan) 111

Electrical and electrochemical properties of TiO_2–SiO_2 porous glass ceramics and their application
T. Kokubu, Y. Nakahara (Miyazaki, Japan), M. Yamane (Tokyo, Japan) and M. Aizawa (Yokohama, Japan) 123

On the interfacial excess entropy at the mercury–aqueous solution interface
S. Bordi and M. Carlà (Firenze, Italy) 137

Titanium electrodeposition from aromatic solvents
A.P. Abbott (Liverpool, UK), A. Bettley (Chester, UK) and D.J. Schiffrin (Liverpool, UK) .. 153

The electrodeposition of amorphous molybdenum sulfide
D. Bélanger, G. Laperrière and B. Marsan (Montréal, Canada) 165

Piezoelectric response to changes in surface stress of a palladium electrode in perchloric acid solution containing chloride ions
M. Seo and M. Aomi (Sapporo, Japan) 185

Surface analysis of electrochemically oxidized metal sulfides using Raman spectroscopy
S.B. Turcotte, R.E. Benner (Salt Lake City, UT, USA), A.M. Riley (Menlo Park, CA, USA), J. Li, M.E. Wadsworth and D.M. Bodily (Salt Lake City, UT, USA) 195

Impedance measurements of a tin electrode in H_2SO_4 solutions
M. Bojinov (Sofia, Bulgaria), K. Salmi and G. Sundholm (Espoo, Finland) 207

In situ compositional analysis of electrosynthesized cadmium telluride thin films by electrochemical quartz crystal microgravimetry
C. Wei, N. Myung and K. Rajeshwar (Arlington, TX, USA) 223

Effect of the solution composition and the applied potential on the kinetics of roughness relaxation at gold electrodes in slightly acid electrolytes
M.P. García, M.M. Gómez (Madrid, Spain), R.C. Salvarezza and A.J. Arvia (La Plata, Argentina) 237

Micro-rheology changes of Nafion® films with electrochemical mass-transport in hydroquinone solutions and in situ measurement using a quartz crystal analyzer
H. Muramatsu, X. Ye and T. Ataka (Chiba, Japan) 247

Transfer of trifluoroacetylacetone across a water/1,2-dichloroethane interface
H. Doe, Y. Hongo, E. Nishimoto and T. Kitagawa (Osaka, Japan) 257

Direct electron transfer reactions between immobilized cytochrome *c* and modified gold electrodes
J.M. Cooper (Glasgow, UK), K.R. Greenough and C.J. McNeil (Newcastle upon Tyne, UK) . 267

An electrochemical study of tinidazole at mercury electrodes
J.M.L. Fonseca, M.C.G. Rivera, J.C.G. Monteagudo and E. Uriarti (Santiago de Compostela, Spain) 277

Modulation of the function of an enzyme immobilized in a conductive polymer by electrochemical changing of the substrate concentration
T. Haruyama, H. Shinohara, Y. Ikariyama and M. Aizawa (Yokohama, Japan) 293

Electrocrystallization, stripping and photoelectrochemical properties of HgSe/Se films on mercury electrodes
G. Mattsson, L. Nyholm (Uppsala, Sweden) and L.M. Peter (Southampton, UK) 303

Preparation and reversible behavior of organized thiol monolayers with attached pentaminepyridineruthenium redox center
H.O. Finklea and D.D. Hanshew (Morgantown, WV, USA) 327

Adsorption studies of octadecyltrimethyl ammonium bromide by electrochemical methods
D. Krznarić, Z. Kozarac and M. Lovrić (Zagreb, Croatia) 341

A voltammetric study of glyoxylic acid behaviour on platinum single-crystal electrodes in sulphuric acid medium
J.M. Orts, J.M. Feliu and A. Aldaz (Alacant, Spain) 355

Adsorption behavior of viologen derivatives on hanging mercury electrode surfaces
F. Kitamura, T. Ohsaka and K. Tokuda (Yokohama, Japan) 371

Study of the relationship between voltammetric behaviour and electrocatalytic activity in the reduction of ClO_4^- ions at platinized platinum electrodes
I. Bakos and G. Horányi (Budapest, Hungary) 383

Short communications

Electroanalysis of lipoic acid using a carbon paste electrode modified with nickel[II]-cyclohexylbutyrate
K. Sugawara, S. Tanaka, K. Hasebe and M. Taga (Hokkaido, Japan) 393

Electrochemical study of uranium (IV) and (III) organometallic compounds in tetrahydrofuran by means of conventional microelectrodes and ultramicroelectrodes. Part II. Application to borohydride compounds—study of the stability of $Cp_2U(BH_4)_2$
D. Hauchard, M. Cassir, J. Chivot, D. Baudry and M. Ephritikhine (Gif-sur-Yvette, France) . 399

Preliminary notes

Efficient electrochemical reduction of nitrate to ammonia using conductive diamond film electrodes
R. Tenne, K. Patel, K. Hashimoto and A. Fujishima (Tokyo, Japan) 409

Solid-state electrochemical cell for characterization of thin films in the absence of liquid electrolyte
P.J. Kulesza, G. Chelmecki and B. Galadyk (Warsaw, Poland) 417

Voltammetry of fullerenes C_{60} and C_{70} in dimethylamine and methylene chloride
K. Meerholz, P. Tschuncky and J. Heinze (Freiburg, Germany) 425

Electrochemical characterization of manganese porphyrins fixed onto silica and layered dihydroxide matrices
L. Gaillon, F. Bedioui, J. Devynck and P. Battioni (Paris, France) 435

Vectorial electron transfer in flavolipid/cytochrome *c* heterolayer
S. Ueyama, O. Wada, M. Miyamoto, H. Kawakubo, K.-i. Inatomi and S. Isoda (Hyogo, Japan) 443

Electrochemical rectification in CdSe + TiO_2 coupled semiconductor films
D. Liu and P.V. Kamat (Notre Dame, IN, USA) 451

A novel differential electrochemical mass spectrometer (DEMS) with a stationary gas-permeable electrode in a rotational flow produced by a rotating rod
M. Fujihira and T. Noguchi (Yokohama, Japan) 457

Preparation of a poly(cyclodextrin-pyrrole) modified electrode
J.-C. Lepretre, E. Saint-Aman and J.-P. Utille (Grenoble, France) 465
